PIONEER 1947 **NAMKWANG**

NAMKWANG ENGINEERING & CONSTRUCTION CO., LTD.

The Namkwang E&C, a company that grew alongside the history of Korean construction industry, is represented by its corporate mark: a soft-lined rectangular shape forming the company's initial 'N'. This mark is designed to illustrate the stable yet environmentally friendly corporate image as well as its flexible characteristic, which is a clear distinction from the inflexible and conservative image of other preexisting construction company. This ultimately shows the company's infinite possibilities and its client-oriented corporate culture.

Also, the initial 'N' epitomizes a high-standing mountain expressing the company's second leap towards its advancement as a top-tier corporation in the industry. The corporate color, Dark Blue, symbolizes the enterprising and trustworthy standing of Namkwang E&C and the color's harmonious blend into the background collage signifies the 'Namkwang E&C B to B system' which is a platform designed for constant communication and cooperation with the clients. Most importantly, the well-arranged colors reflects the strong architect's will of the company to create an advanced and unique residential environment.

'Haustory', the new title of Namkwang E&C's apartment, is designed with logic and precision using the golden ratio to allow for a visual stability fit for a high class 21st century apartment. Also, the usage of flashy decorations were minimized to encompass a sophisticated image befitting the modern style.

The combination of the modern and arranged rectangular shape with the avant-garde handwritten English logo well shows that the space is designed with ration and copious experience of an expert company which focuses on creation of advanced and creative residential space.

Also by using the corporate color dark blue as the brand color, the brand shows direct relationship with the corporate image which expresses confidence in the brand as Namkwang E&C's representative brand. This will deepen clients' trust in the brand as well as maximize the value of the brand in the long term.

PIONEERING THE NEW HISTORY OF CONSTRUCTION

With responsibility as a company that led Korea's construction history, With unwavering architect's spirit that we kept over 70 years, With commitment to building a better Korea, Namkwang E&C will take a step forward to rewrite Korea's great construction history.

CONNECTING THE WORLD

We paved new roads when there were none. We laid bridges where there were none. The company that has led the way to connect the unreachable corners of Korea as well as the world. Namkwang E&C brings the world closer with its 70 years of experience and technology.

PIONEER SINCE 1947
NAMKWANG

Dongho Great Bridge

SURPASSING THE LIMIT OF CONSTRUCTION

PIONEER SINCE 1947
NAMKWANG

Everybody had doubts. Nobody could put it into action.
The company that successfully delivered numerous demanding
projects with leading-edge technology.
Namkwang E&C has built a life of abundance beyond the limits of
Korea's construction.

Construction for Seoul Subway Line 5 (First subaqueous Tunnel)

DESIGNING HAPPINESS INTO SPACE

PIONEER SINCE 1947
NAMKWANG

Space where families share love. Space where neighbors develop friendship. The company that has led Korea's residential culture from floor plans and landscaping to finishing materials. Namkwang E&C has building a residential space that adds happiness to human life.

Busan Seomyeon Houstory Construction Project

**With the power that has built up Korea,
Namkwang will be world-leading construction
company.**

Namkwang Engineering and Construction Co., Ltd, a company established in Busan in 1947 and a company that has led Korea's construction history, is now announcing its second great leap to become a global company to lead the construction industry.

The 70-year history of Namkwang is not only the history of one company, but the history of Korea's construction industry that built the Korea of today. From proposing a new residential culture in the housing industry to large-scaled social overhead capital construction, Namkwang has made unmatched endeavors to building a greater Korea. We have become an unrivaled player in the Korean civil engineering industry, as demonstrated by various successful projects such as Korea's first ever sub-river tunnel on Subway Line 5, Gyeongbu, Yeongdong, Honam, and Jungang Expressways that serve as the main artery of Korea, Gyeongui Double Track Railroad that will go into North Korea and Dongho Bridge, a sophisticated structure that requires cutting-edge technology.

Also, with its leading technology and wealth of experiences, Namkwang has raised the status of Korea's construction by actively reaching out to the foreign construction industries ranging from architecture, road, dam, and harbor in countries such as Saudi Arabia, Iraq, Philippines, Angola, UAE and Vietnam.

Namkwang has grown with creative ideas, constant challenges and limitless entrepreneurial spirits. It is now stepping forwards for one of top 10 construction companies by 2030. We are ready to become a global corporation valued not only in Korea but also across the world. We work in diverse sectors to attain the growth engine. We also select and focus on the most suitable projects that will lead to profitability. In addition, we secure competitiveness through the cost management practices in the industry. Finally, we offer a holistic solution through creative working environment that respects different views.

We ask you to support our growth on the global stage with our world-class technology and know-hows. We will strive to become a leader in the global construction industry that provides the ultimate satisfaction to the dynamic construction market.

Thank you.

President / PE **Min Kyu Lim**

BUSINESS AREAS

The company that pioneers korea's construction history, Namkwnag E&C brings us one step closer to the future of mankind.

As a company that paves new road to a roadless area, Namkwang E&C is no word of complacency in its dictionary. Namkwang will continue to thrive forward with the mission to bring closer the future for the humanity by becoming a renowned global company in all fields of construction such as building, civil engineering, environment, and overseas business.

North Korea Business

'Namkwang NK', the local subsidiary in Gaesong Industrial Complex

'Namkwang NK', the local subsidiary that produces steel frames, was founded in order for the efficient facilitation of the North projects through enhancing the North-South economic cooperation. The technology and the resources are funded by the Namkwang E&C whereas the manpower is supplied by North Korea.

'Namkwang NK' has manufactured and installed the steel frames of the entering companies of Kaesung Industrial District. It is a exclusive corporate subsidiary established for the NK projects with its purpose to participate in the future large-scale construction project.

- 1 Gaeseong General Support Center (North Korea)
- 2 Gaeseong Steel Frame Factory (North Korea)

The footprints of Namkwang become history.
The creations of Namkwang become our pride.

70 years of dedication to construction, Namkwang’s history is the history of Korea’s construction. 70 years of countless gratitudes, Namkwang’s architecture is Korea’s pride.

PIONEER 1947
NAMKWANG

With 200 years of history, our goal is to grow into a **top 10 Korean construction company**

We are ready to grow into a global corporation valued not only in Korea but also in the global industry
by working in a wide range of sectors to develop growth engines, selecting and focusing on the most suitable projects
that will lead to profitability, securing the best cost competitiveness, and offering a holistic solutions through
creative working environment that respects different views.

Great History of Korean Construction

Coming out of the past, we prepare for future.
Steering away from wide roads, we create new roads to
keep moving forward. We grew throughout
Korea's construction history,
which led to 70 years of know-hows and expertise.
Namkwang is your trustworthy partner.
